CAREER OBJECTIVE

Career-focused data professional skilled in **Python, SQL, data analytics, data science, and AI/ML**, with a strong ability to transform complex data into actionable insights. For critical thinking I have great grip on **DSA** in java with solving multiple questions on leetcode. Good Knowledge in **HTML, CSS, JAVASCRIPT and REACT.** Committed to delivering measurable value and driving data-driven growth with attractive and efficient developing interface.

EDUCATION

B.Tech in Information and Communication Technology
Adani University, CGPA – 6.7

H.S.C.
Sharda Mandir High School, Percentile =96 %

SKILLS

Python, Java, HTML, CSS, JavaScript, React, Data libraries, ML concepts, DSA, SQL, Power BI

ACADEMIC PROJECTS

Credit Card Payment Fraud Detection using Machine Learning (collaboration)

- Built a machine learning fraud detection system to identify suspicious credit card transactions. Applied data preprocessing, imbalance handling, and classification models to improve detection accuracy. Evaluated performance using precision, recall, and confusion matrix. Strengthened hands-on skills in Python, ML, and real-world data analysis.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn Machine Learning

House Price Prediction:

- Using Linear regression model, we predict house price and also convert raw csv data into meaningful data for prediction by doing feature engineering and EDA.

Currency Converter:

- Made Currency converter which gives user friendly interface for user to convert the currency of choice of user. Project uses Api call for getting currency name and its current value and also made custom hook.

CERTIFICATIONS

Java Programming with DSA- Kunal Kushwaha

LIBRARIES & DATABASE

- NumPy, Pandas, Seaborn, Matplotlib, Scikit-learn
- SQL

LANGUAGES KNOWN

Gujarati, English, Hindi
